Draw the layout of your home as best you can. Include:

- Doorways and windows in each room
- Smoke alarm locations
- Carbon monoxide alarm location(s)
- Fire extinguisher location(s)

Visit each room in your home and:

- Find two ways out—Draw arrows on your plan

Draw a separate floor plan for:

- Basements, 2nd or 3rd floors, and/or finished room over the garage (FROG)

Mark your safe meeting place on your plan:

- Pick a solid object not easily moved, such as a tree or mailbox
- Make sure the object is a safe distance away from your home

Remember:

- Practice** your plan at least twice a year and attempt escape from every room
- Close the door** behind you as you escape
- Sleep with your bedroom door closed**—it may save your life
- Doorways and windows should open easily to get outside
- If safe, windows can be used for an escape but you must practice
- NEVER** stop to pick up anything on the way out
- NEVER** go back into the home for any reason—**Get Out, Stay Out**
- Call 911 from outside the home**

Children, or those who are hearing impaired, don't always wake up when a smoke alarm sounds. Before a fire occurs, practice a fire drill plan.
